

Bioresonance Testing Report

SafeSpace Cell Patch™

Michael B. Nokken, D.C.

SAFESPACE CELL PHONE PATCH TEST RESULT NOTES

SUBJECT ONE

General Conclusion

- ❑ The SafeSpace Cell Patch eliminated EMF Stress before and during cell phone use (lines 2–8).
- ❑ Decreased vitality was restored to normal or “good vitality” using SafeSpace Cell Patch (line 1).
- ❑ The SafeSpace Cell Patch improved the extent to which DNA was being negatively affected so that it was not detectable (lines 30-36).

SUBJECT TWO

General Conclusion

This subject had notable EMF disturbance before and during cell phone usage.

- ❑ The SafeSpace Cell Patch eliminated all EMF stress (lines 2–8).
- ❑ Vitality readings were improved to normal or “good vitality” when using the SafeSpace Cell Patch (line 1).
- ❑ Organ stress was reduced and no detectable DNA stress was found while using the SafeSpace Cell Patch (lines 26-36).

SUBJECT THREE

General Conclusion

- ❑ Presenting magnetic field disturbance and EMF stress created by cell phone usage were both eliminated by the SafeSpace Cell Patch (lines 2-8).
- ❑ Vitality readings were improved from a mild decrease to “good vitality” (line 1).
- ❑ The extent to which DNA was negatively affected in the respective “stressed organs” was lessened by the SafeSpace Cell Patch (lines 30-36).

SUBJECT FOUR

General Conclusion

- ❑ EMF stress created by cell phone usage was eliminated by the SafeSpace Cell Patch (lines 2-8)
- ❑ Vitality readings improved from a moderate decrease (initial test and with cell phone use) to “good vitality” (line 1).
- ❑ In this test, the use of a cell phone demonstrated many areas of neuroendocrine and central nervous system stress (lines 11, 12, 15, 16, 17, 26) all of which were eliminated by the SafeSpace Cell Patch.

SUBJECT FIVE

General Conclusion

This test showed the seeming paradoxical effect of added EMF's to a biological system.

- ❑ Vitality readings and EMF disturbance improved with both the cell phone and the cell phone with the SafeSpace Cell Patch (lines 1-8).

- ❑ However, numerous areas of organ and DNA stress occurred while using the cell phone (lines 10, 12, 17, 18, 20, 21, 23-28, 30-36). The SafeSpace Cell Patch eliminated the majority of these stress patterns.

SUBJECT SIX

General Conclusion

- ❑ Use of a cell phone created demonstrable stress in the thalamus and circulatory systems (lines 6, 11-12, 20-22).
- ❑ The SafeSpace Cell Patch eliminated all stress readings involving the thalamic and emotional centers of the brain and reduced the level of circulatory stress.
- ❑ The SafeSpace Cell Patch reduced the extent to which DNA was negatively affected in the respective organs (lines 30-36).

SUBJECT SEVEN

General Conclusion

- ❑ EMF stress before and during cell phone usage was entirely eliminated by the SafeSpace Cell Patch (line 2-8).
- ❑ Vitality readings which had been reduced severely with cell phone use were restored to normal or “good vitality” (line 1).
- ❑ Neuroendocrine stress (lines 6-8) created by the cell phone was reduced, as was organ involvement (lines 26-29) and the extent to which DNA was being negatively affected (lines 30-36).

SUBJECT EIGHT

General Conclusion

- ❑ This subject demonstrated no obvious EMF stress during cell phone usage (lines 2-8). This was likely due to the initial normal vitality reading (line 1) showing this person to be fairly resilient and healthy.
- ❑ The cell phone demonstrated clear stress readings in regions of the brain (lines 11-12) and neuroendocrine organs (lines 15-17) and especially the heart (lines 13, 26).
- ❑ Remarkably, nearly all of the stress was eliminated including a very significant reduction of DNA stress once the SafeSpace Cell Patch was used.

SUBJECT NINE

General Conclusion

- ❑ EMF stress for the cell phone was eliminated by the SafeSpace Cell Patch (lines 2-8) and vitality readings were brought to normal or “good vitality” (line 1).
- ❑ Interestingly in this test, dental involvement before and during the cell phone tests (lines 7, 14, 19) were eliminated while using the SafeSpace Cell Patch.
- ❑ The extent to which DNA was negatively affected in the respective organs was reduced by use of the SafeSpace Cell Patch (lines 30-36).

SUBJECT TEN

General Conclusion

- ❑ EMF stress from cell phone usage was eliminated by the SafeSpace Cell Patch (line 7).
- ❑ Presenting magnetic field disturbance was also eliminated (line 6).

- ❑ Vitality readings were improved from a moderate decrease in vitality to normal or “good vitality” (line 1).
- ❑ The extent of organ imbalance was diminished and shifted to a less significant organ focus (from heart and hypothalamus to the thyroid) (lines 26-29).
- ❑ The extent to which DNA was being negatively affected in the respective primary organs of involvement was lessened by the SafeSpace Cell Patch (lines 30-36).
