

ECO Laser CUTTING EDGE TECHNOLOGY for ENVIRONMENTAL CLEARING

\$300.00

The ECO Laser simultaneously Clears, Balances, and Imprints Energetically.

The ECO Laser has a very focused and structured light beam which emits a powerful, fast-acting coherent energy for clearing and balancing environments. Dimensional Design's proprietary encoding of the color harmonics into the laser light sets the ECO Laser apart from other lasers on the market. Also unlike other lasers there are no chaotic harmful electromagnetic radiation fields emitted from the device. Other lasers simply can NOT do what the ECO Laser can. The ECO Laser light is permanently imprinted and cannot be weakened, altered or neutralized.

ENERGY QUALITIES

The higher harmonics of color are infused in the ECO Laser light. The qualities inherent in the 12 colors and their harmonics contribute to the energy around all life forms and help to keep life balanced. Because of electromagnetic pollution many color qualities have been removed and replaced with toxicity. When the laser light is beamed onto materials or areas of an environment it transforms and imprints the color qualities into the targeted area. The ECO Laser works quickly to eliminate toxic energy, congestion and blocked energy. When samples or materials are treated with the laser, toxic energies are transmuted into beneficial energies. When the laser light is beamed onto a small area of a material a resonance affect occurs immediately transferring the encoded light qualities to all similar materials. (ex. treating 1 specific tile impacts all similar tiles) The imprinting is not limited by the size of the area.

The ECO Laser has been permanently encoded by a proprietary process. The laser beam carries energetic qualities that have amazingly enhanced healing properties for the environment. This laser is designed to neutralize the negative effects of chaotic energy fields and restore balance and harmony. As the light is projected onto areas it clears toxins and imprints the area with life enhancing color qualities that restore balance to the area.

CLEARs BALANCES AND IMPRINTS ENERGETICALLY

CLEARING: Eliminates and neutralizes toxins

BALANCING: Transforms materials restoring balance and harmony

IMPRINTING: Raises the vibration of materials through coherent full spectrum light

5 FOCUSING TIPS FOR MAXIMUM APPLICATIONS:

The laser has 5 interchangeable tips for specific clearing applications. Each tip has been encoded and carries a specific geometric pattern and energy quality.

Circle Pattern

Clears disharmonious **etheric or subtle energy** patterns from any area brightening any area where energy has stagnated and become energetically "heavy or dark". Effectively clears spaces of stagnant energetic residue from negative psychological or emotional patterns.

Cross Pattern

Clears any toxic imprinting from **physical materials**. This is the most commonly used tip and a good standard for most applications. The cross pattern will clear toxic encoding from walls, floors, furniture, clothes, beds, paper, jewelry, eye glasses and other personal items as well as from food and water etc.

Line

The line is useful for any **horizontal or vertical areas** that have energetically stagnated. It is useful for clearing toxicity from 90 degree angles in rooms, corners, etc.

Point

Focuses maximum intense light on specific **smaller areas** or objects that need clearing.

Arrow

Directs the **flow of energy** towards or away from a specific area. Pointing the arrow on the stagnant area simply move the arrow in the appropriate direction.

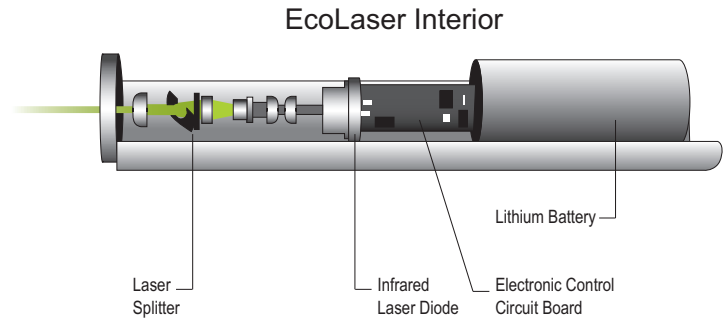

DISCLAIMER

This laser is not FDA approved for medical purposes. Neither Dimensional Design Products, Inc. nor its independent distributors make any claim that our products are intended to prevent, cure, mitigate, treat, or diagnose disease or medical conditions. If you have any reason to believe that you have a health problem, you should seek advise from a health professional.

All the internal components of the ECO Laser have been energetically transformed.

The **SafeSpace ECO Laser** has a very focused and structured beam. This is what makes it so fast-acting and powerful to use in the home or as a Health Practitioner. The Laser has been treated with energetic qualities and has amazingly enhanced healing properties for the environment.

Unlike other lasers, the Safe Space **ECO Laser** has been treated so that there are no chaotic (harmful electromagnetic radiation) emitted from the device. **Other lasers simply can NOT do what this laser does.** Through our proprietary process all internal elements within the laser are cleared and energy balanced so that the laser light emits harmonious balancing energies.

ECO Laser Accessories

GeoResonator ... Energy Tube for the ECO Laser \$49.95

The SafeSpace GeoResonator pattern is imprinted into a hologram inside a metal tube. It's designed to be attached to the ECO Laser to amplify the effect of the GeoResonator energetically into the environment. When the laser light shines through the laser tip, it carries the imprinted wave pattern of the GeoResonator to the area being treated. To help balance environmental areas, the laser can be directed onto soil, plants, trees & water. The GeoResonator emission contains several harmonizing and resonant patterns that positively influence the environment, including:

- Full Color spectrum that supports life processes
- Energy imprints of 64 minerals associated with the periodic table
- Geomagnetic earth pattern to balance the soil and land
- Patterns to support atmospheric balance

64-Mineral / DNA ... Energy Tube for the ECO Laser \$49.95

The SafeSpace 64 Minerals/DNA Hologram is carried in this tube for the ECO Laser. The hologram is imprinted with the energy of 64 minerals that represent the basic components of health at the genetic level. The energetic formulation of the imprinted minerals is based on the research of Richard Olree, a genetic pioneer whose research shows that there are 64 specific minerals that are extremely important, if not essential for creating balance. The laser light acts as a carrier wave for this complex pattern. The area that is being treated absorbs the specific mineral pattern that is needed based on the principle of resonance.
